

# AGRI RICH

## ORGANIC FERTILIZER

### HOW IS AGRI RICH ORGANIC FERTILIZER SUPERIOR TO UREA

1. Agri Rich organic Fertilizer are cheaper 30% to 40% Compared to Urea
2. Agri Rich organic Fertilizer Maintain Soil Nutrient Without destroying the environment and the plant life
3. Increases the structure of the soil and bio-life in the soil
4. It arrests the percolation loss of water from the soil
5. It increases the cat-ion exchange capacity of the soil
6. It increases the water holding capacity of the soil and thereby water use efficiency(WUE)
7. Increases the aeration and aggregation in the soil
8. Ameliorates the soil related problems such soil hardness and surface droughtness
9. Prevents the formation of plinthites (hard rock like consolidation) in the soil
10. It increases the soil organic matter contents and humus fractions-It is eco friendly and is a non pollutant

### Contents :-

Nitrogen	- 1.25 to 2.50%	Copper	- 100 to 200 ppm
Phosphorous	- 1.25 to 3.50%	C:N Ration	- 20:1
Potassium	- 1.25 to 3.50%	Ph Value	- 6.5 to 7.5
Calcium	- 1.50 to 3.50%	Electrical	- <500 Micromhos / cm
Magnesium	- 0.30 to 0.50%	Conductivity	
Iron	- 0.60 to 1.20%	Organic Matter	- 30 to 45%
Maganese	- 600 to 900 ppm	Moisture	- 25 to 35%
Zinc	- 100 to 300 ppm		

### How to Use:- Application

1. It is recommended to use @ 0.5 tons per acre in the case of short term crops before sowing
2. For long term and perennial crops @ 1.0 ton per acre before sowing

**SHELF LIFE: MORE THAN 1 YEAR UNDER OPTIMUM STORAGE CONDITIONS.**
